AUTHORITY MEMORANDUM

1.00 Section 11 (f) of the MWRRA Act (Act No.XVIII of 2005) reads as below:

“To review and clear water resources projects proposed at the sub-basin and river basin level to ensure that a proposal is in conformity with Integrated State Water Plan and also with regard to the economic, hydrologic and environmental viability and where relevant, on the State's obligations under Tribunals, Agreements, or Decrees involving interstate Entitlements:

Provided that, while clearing the new water resources projects by the concerned for construction proposed by River Basin Agencies, the Authority shall ensure that Governor's Directives issued from time to time, relating to investment priority for removal of regional imbalance are strictly observed;

Provided further that, in respect of the projects situated in Marathwada and Vidarbha Regions, the powers to accord administrative approval or revised administrative approval, under this clause, shall in accordance with the Governor's directives, be exercised by the concerned River Basin Agency".

2.00 The Projects at Sr. No. (a) & (b) in Godavari basin and Project at Sr. No. (c) in Tapi basin in Amravati Division were received for clearance by MWRRA under above mentioned Section of the Act, vide above Refs.

- (a) Mangalsa (L.M.I.) Storage Tank, Taluka Mangrulpir, District Washim
- (b) Sattar Sawanga (L.M.I.) Barrage, Taluka Mangrulpir, District Washim
- (c) Naya Andura (L.M.I.) Project, Taluka Balapur, District Akola

3.00 (i) Mangalsa (L.M.I.) Storage Tank and Sattar Sawanga (L.M.I.) Barrage has been cleared by CE, (SP) WRD, Amravati for water availability of 4.77 Mm³ & 6.953 Mm³ respectively at 50% dependability at proposed sites based on Government's letter dated 18/03/2008 which is in turn based on a study by C.E. (H.P.) Nashik. These projects are coming in the catchment of ongoing Adan project (Medium). This Study state that water available upto Adan Project at 75% dependability is 92.45 Mm³; at 50% dependability is 197.28 Mm³ & annual average is 205.16 Mm³. The total utilisation in this catchment from all projects is 121.68 Mm³ & for the new MI projects, 30.00 Mm³ water is allotted. So total water use upto Adan Project is 151.68 Mm³ & its dependability reduced to 64.56%. However vide WRD's Letter dated 18/03/2008, 69.00 Mm³ water is allotted from Adan Project for the new MI projects. So total water use upto Adan Project is 190.68 Mm³ & its dependability would be around 50.00%.

- 3 -

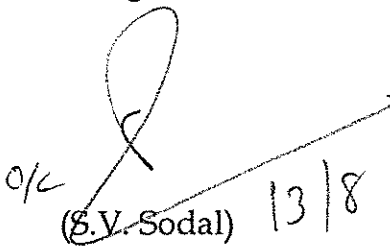

- (ii) Naya Andura (L.M.I.) Project has been cleared by CE, (SP) WRD, Amravati for water availability of 8.579 Mm³ at proposed site based on Government's letter dated 01/01/2009 which is in turn based on a study by C.E. (H.P.) Nashik on water Availability for future projects in Purna sub basin in Tapi basin up to Jigaon Project. This Project is coming in sub catchment 'G'. The total water available for utilisation from sub catchment 'G' at 75% dependability is 201.02 Mm³; at 50% dependability is 273.43 Mm³ & annual average is 277.81 Mm³. For the future projects, 133.37 Mm³ water will be utilised & thus total water utilisation in sub catchment 'G' is 201.02 Mm³ which is 75% dependable flow. But this project will affect the dependability of Jigaon Project by reducing its dependability from 75% to 59%.
- (iii) The BC ratio is more than 1 for Projects at Sr. No. (a) to (c). These projects are in backlog area.
- (iv) The projects at Sr. No. (a) to (c) are within prescribed cost norms in terms of Rs / 1000 cu.m. of Gross Storage.
- (v) Mangalsa (L.M.I.) Storage Tank & Sattar Sawanga (L.M.I.) Barrage are in District Washim and Naya Andura (L.M.I.) Project is in District Akola, which are backlog districts and the irrigation backlog in Akola District (including Washim District) as on June 1994 is 1,77,280 ha in SRE and balance backlog of June 1994 as on June 2008 is 1,06,680 ha in SRE. These projects have a total potential in SRE of about 6,200 ha.

4.00 While allocation of water at a dependability lower than 75% required to remove irrigation backlog, affects performance of an existing major and medium project in the sub-basin which are already techno economically approved as per existing norm of 75% dependability for major and medium projects in an inter state basin. Thus the distress in form of water availability is being shared by existing and new projects with a view to remove irrigation backlog by lowering the dependability for water availability from 75% to upto average flow. This revised policy will have to be got approved from the State Government keeping all techno-economic and legal aspects in view and construction of

these 3 - L.M.I. Tanks in Amravati Region may be taken up only after the approval to this policy.

- 5.00 Environmental clearance is required for this project as per Notification of Ministry of Environment and Forests, Government of India, September 2006. The environmental clearance may be obtained from Competent Authority as stipulated by MoEF.
- 6.00 It is presumed that these projects do not involve diversion of forest land. A certificate to this effect needs to be furnished from concerned Forest Dept.
- 7.00 The MWRRA is, therefore, pleased to accord Conditional clearance to these 3 - L.M.I. Tanks in Amravati Region under Sec.11 (f) of the MWRRA Act as per salient features appended herewith subject to compliance of condition mentioned in Para-4 above, environmental clearance & forest clearance.
- 8.00 This clearance is issued under reference No. 88 dated 13/08/2009 and is registered under MWRRA / 2009 / PRCL / VIDC / 29-3MI / 406 dated 13/08/2009 in the office of the Authority.
- 9.00 The Receipt of this Memorandum may please be acknowledged.
