Maharashtra Water Resources Regulatory Authority

(A Statutory Authority Established u/s 3 of Maharashtra Water Resources Regulatory Authority Act, 2005)

Resolution No. 36 Dated May 21, 2019

Coram: Shri. K. P. Bakshi, Chairman

Shri. V. M. Kulkarni, Member (WRE)

Shri. Vinod J. Tiwari, Member (Law)

Dr. S. T. Sangle, Member (Economics)

WHEREAS, Executive Director, Tapi Irrigation Development Corporation, Jalgaon ("Project Proponent" for short) vide letter dated 08/01/2019 has submitted the proposal of a Medium Project which involves construction of 7 - Pneumatically Operated Gated Weirs on Girna River, District Jalgaon for the clearance of Maharashtra Water Resources Regulatory Authority ("Authority" for short) along with the scrutiny note and comments of State Level Technical Advisory Committee for clearance under Section 11(f) of the MWRRRA Act, 2005 ("Act" for short);

AND WHEREAS, on scrutiny of the above said proposal of a Medium Project with respect to provisions in the Section 11(f) of the Act and "Policy for Clearance of Water Resources Projects", it is observed that,

- A) The proposed Medium Project consist of Seven - Pneumatically Operated Gated Weirs on Girna River in Girna Sub-basin of Tapi Basin in Jalgaon District with annual water utilisation of 25.42 Mm³ and Irrigable Command Area (ICA) of 4432 ha;
- B) The said Project is part of the Integrated State Water Plan (ISWP), approved by the State Water Council under Section 16(4) of the Act, in its meeting dated 11/02/2019 and as per the WRD's letter dated 16/05/2019. The Volume II B of the ISWP specifies annual water utilization of 25.481 Mm³ for these weirs.
- C) The Project's B/C ratio is 1.55 which being more than norm of 1.50 which is the yardstick for Medium Project. Thus, the said project seems economically viable.

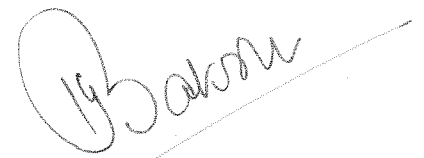

- D) Chief Engineer (Planning & Hydrology) Nashik has given water availability certificates of 25.481 Mm³ dated 22/10/2013 to this project at 75% dependability. Thus, the proposal seems hydrologically viable.
- E) At present, though the administrative approval has already been granted by the State Government for the Project and necessary provision for mitigating environmental impact, if any has also been made, however no Environment Clearance has been granted to the project so far.
- F) The proposed Project is on Girna River which is a tributary of Tapi Interstate River. However, the proposed gross water use of 25.481 Mm³ is within the allocation of the State.
- G) Hon. Governor vide letter of the Secretary to the Hon Governor dated 29/09/2018 has given in-principle approval to the said medium project on condition that the project will be funded 100% by the grants of Government of India.

NOW, THEREFORE, IT IS HEREBY RESOLVED THAT

Having examined the proposal as per the mandate of the provisions in Section 11(f) of the MWRRA Act, 2005, this Authority hereby resolved, alluding the State Government on the following :

- a) This Authority hereby grants permission to proceed further for other clearances for the said Medium Project.
- b) The Project Proponent be directed to submit the copies of the Statutory Clearances immediately upon getting the same and if there is any change in the scope of the proposed project due to the conditions in the statutory approvals, the Project Proponent shall approach this Authority in order to ensure the economic, hydrologic and environment viability of the proposal.

Mumbai
Date - 21/05/2019

(K. P. Bakshi)
Chairman, MWRRA
